

CEFTIODURE® 100 L.A

Injectable Suspension

Extra long-acting antibiotic up to 7 days of effectiveness with one single dose - Zero milk residues

Formulation

Ceftiofur (as free acid) 100 mg, excipients q.s. ad 1 mL.

Indications

Extra long-acting and broad-spectrum cephalosporinic antibiotic, effective against Gram-positive and Gram-negative bacteria including strains that produce B-lactamases. Effective for the treatment of respiratory diseases (BRD, shipping fever, pneumonia) and interdigital necrobacillosis in dairy cattle. In pigs, for the treatment of respiratory diseases associated with *Actinobacillus*, *Pasteurella*, *Haemophilus*, and septicaemia processes, polyarthritis or polyserositis. In horses, for the treatment of the lower respiratory tract caused by susceptible strains of *Streptococcus equi*.

Dosage and Administration

Pigs: 1 mL/20 kg of b.w. single dose, intramuscular route in the post auricular region of the neck; cattle: 1 mL/15 kg of b.w. single dose, subcutaneous route in the base of the ear (back dorsal rear of the ear where the head is connected); horses: 1 mL/15 kg of b.w. intramuscular route.

Commercial Presentation

Bottle x 100 mL,
